Subject: Silverton Area Soils Sampling - Proposal to Town

Hello Folks,

Attached is the proposal that we prepared for delivery to the Town by Monday afternoon. Joyel

assumed the lead on preparing this working with the technical team. Please review this and provide any comments you may have to Joyel. If there are fundamental difference of opinion on what the message and strategy should be versus what is presented in the attached, then we may need to have a meeting with Martin. However, I am happy to discuss it with you before arranging a large gathering with little time to do so.

There are a couple maps that are being developed by Joyel that show the area of the Rose Walsh investigation just for background information, and then the general areas that we are proposing be included in this Phase of sampling.

I am on site at Red and Bonita Mine, so my access to communications during the day is limited, so please contact Joyel if you have questions.

Thank you,

Steve
